Get Expert Computer Support and Service from Avenue 18 Computer

Time to get it Fixed!

Greetings from Avenue 18 Computer!

DO YOU NEED someone to check your computers and systems to see that they are secure and backed up?

Are you getting the necessary support, system tuning and updates needed for efficient computing?

WE CAN HELP!

We have serviced, maintained, upgraded and optimized numerous pc's and servers in Los Angeles since 1989. Whether on-site, in our shop or by our secure Remote link, we'll bring top quality solutions to you and your business.

We cure Virus/Spyware/Popups problems, upgrade and refine your networks, implement a complete backup strategy and provide remote monitoring to confirm your backups are actually running as expected. We also provide training, documentation and excellent phone support, Data cabling installation for home and office networks and multimedia integration is our specialty. Service contracts are available.

COMPLETE BACKUP SYSTEMS

There are basically 3 kinds of Backup: 1- Data Only; 2- Comprehensive Backup and 3- Disaster Recovery Backup/SQL

Are you comfortable setting up these systems and monitoring the Backup reports or would you prefer our technicians evaluate the data and keep you informed?

INSTANT REMOTE HELP

For fast, immediate response we offer Remote link support using your fast web connection and our free support tool. Our encrypted support tool is available from our website for convenient download.

ONSITE SERVICE

Don't waste time with Blue Sky consultants who quickly forget about your goals and priorities, or shift you over to lower grade techs when it suits them. You'll work with familiar faces who remember your configuration. We get your system "up" faster with a minimum of fuss. Quality, knowledgeable advice on electronics and system options is included.

All backup is good, but multi-layered backup to external drive(s) is best

ANTI-VIRUS SERVICE

We professionally clean and remove viruses and malware, then build up your system defenses, add updates and cleaning tools to secure your computer from future attack
