** For Right Handed

If you have ever tried to use a Keyboard to play action or puzzle games you may have found it awkward and difficult - *as the default keyboard control assignments are so lame.* I re-assigned the critical key functions for max speed and comfort as shown.
Note: The default key assignments are just fine for keys and functions **not** listed here.

The most important movement in "zone" based games is retreat.

ALT KEY

AIM, WEAPON OPTICAL ZOOM or MELEE BATTLE

Primary Target Acquisition is mighty handy in most war games.
